Clients's Role

PRINT DESIGN

Design your project from a PrintFlix Design Template or go online and use an EZ Template at www.printflix.net/shop_categories

*PrintFlix can also perform the design services using client provided assets like logos, color profiles and graphics.

SOFT PROOF

Receive a soft proof pdf of your design before assembly. PrintFlix waits for client approval before advancing to next stage or production.

PRINT & LAMINATION

PrintFlix begins to print and laminate your full order. Customer needs to determine whether to apply matte or gloss laminate to finish product.

QUALITY CONTROL

Final check for operability, print quality, video and sound quality, and battery charge. Batteries can dissipate in transit, customers should consider shipping with optional USB cables.

START

Determine appropriate PPV product.

Send in your P.O. and down payment.

VIDEO DESIGN

Determine video play list, length of video content, number of audio channels and playback options such as full screen, letter box, etc. Videos do not have to be uploaded at this stage but customer should decide what kind of video content will be used with their PPV product.

*PrintFlix Video Production services can assist with your video production requirements.

HARD PROOF

Receive a working sample of your finished design. Upon approval, volume production begins.

Pay close attention to sound quality and volume levels, the order of your videos if more than one will be included in your project, type errors, color deviations, etc. If you need to make a change, now is the time to do it.

FINISHING & ASSEMBLY

PrintFlix scores, folds and assembles print pages into a final product. Client needs to upload final video to PrintFlix. Upload your videos at the highest resolution, we'll make sure they fit perfectly on your product. Of course, if you want to change out video content after receiving your goods, you can add and delete videos by connecting your product to any PC.

SHIPPING & ORDER FUFILLMENT

Client supplies Fedex shipping account information and remits final payment to Printflix.

PrintFlix's Role

DESIGN ASSIST

Send dieline to client or direct link to EZ Template.

GENERATE SOFT PROOF

A .PDF soft proof is emailed. These are the files that are used to produce the final product.

PRINT RUN

-Bulk printing and lamination of each product.

-Selection and preparation of electronics and supplies

QUALITY CONTORL

Final check for operability, print quality, video and sound quality, and battery charge.

ACCOUNT SET-UP

Establish new account or note existing account. Create new customer portal for clients to check the progress of their project.

VIDEO CONFIRMATION

Determine video play list, length of video content, number of audio channels and playback options such as full screen, letter box, etc. Videos do not have to be uploaded at this stage but customer should decide what kind of video content will be used with their PPV product.

*note: customers can also load products with video on their own at anytime after receiving goods.

CREATE PROTOTYPE

A finished hard proof is created on orders of 50 or more. Client is responsible for making any design or content changes that fall within the capabilities of their product. Capability changes can be accommodated but will most likely lead to a longer delivery time and added cost.

FINISHING & ASSEMBLY

Assemble sheets into a finished product. Printflix die-cuts, folds and glues specific components of each product before final hand assembly.

SHIPPING & ORDER FUFILLMENT

Printflix can provide kitting services when customers are adding supplementary products. The added benefit is that we ensure all PPV products leave our facility with a full charge and are packaged properly to prevent spoilage.
